Another unit of about 150 troops was primarily armed with submachine guns and some light machine guns. A third unit of about 120 very young troops underwent unarmed drill.

Comment:

25X1

The information on SZOLNOK (para 2) is the first since the Fall of 1948 and indicates that the town is strongly occupied by Soviet troops. Information, including statements of local residents that the troops arrived from the SZEGED area in the late Fall of 1949, is possibly true.

From other information it is considered possible that the concentration of Soviet troops in the Hungarian-Yugoslav-Rumanian border triangle (including the 2d Gds Mecz Div, previously stationed in the CRAIOVA area) was later dissolved or at least reduced. It is possible that some of these troops (2d Gds Mecz Div ?) may have been transferred to the interior of eastern Hungary, including the SZOLNOK area.
